# Microsoft Azure and WhistleB's Industry-Leading Whistleblowing System

**“The WhistleB system has been designed with high scalability and flexibility, offering a future-proof service to our customers. WhistleB has chosen Microsoft Azure as its hosting and development platform as it provides the most comprehensive set of compliance offerings of any other cloud service provider.”** Gunilla Hadders Founding Partner WhistleB

- **A WHISTLEBLOWING SYSTEM NEEDS TRUST TO SUCCEED**

When providing a whistleblowing system, safeguarding the anonymity of whistleblowers and protecting customers' sensitive data is a top priority. Both the potential whistleblower and the company need to trust that they can safely use the system. Also, the service must be accessible at anytime and from anywhere for people to report. Microsoft Azure offers the most secure and efficient development and hosting platform for WhistleB to meet these critical needs.

- **THE WHISTLEB SYSTEM**

Microsoft Azure enables WhistleB to provide a service with outstanding availability and the highest security, including legal compliance with the strictest data privacy laws. Whistleblowing cases demand advanced features for efficient and safe investigation. Key functionality provided by Microsoft Azure: Storage account, Cloud service, SQL server, SendGrid Account, Application Insights, App Service, Redis Cache, CDN profile, Cognitive Services/Translation services, Virtual machine, Network interface, Public IP address, Virtual network, Recovery Services vault.

- **BENEFITS**

Microsoft Azure's platform enables WhistleB to provide a trusted future-proof system, designed with the highest security, scalability and flexibility.

The whistleblowing system is available 24/7/365, offering customers a global and secure tool for communication and management of sensitive matters.
